

## WILDFIRE EQUIPMENT

### W8565 series

#### Drip Torch - Aluminium Body/Steel Siphon Tube

Designed for the controlled ignition of vegetation, generally using a mixture of diesel and gasoline/petrol.

Tank capacity - approx. 1 x Imperial gallon

Lightweight aluminium body and handle assembly with steel siphon tube.

Spout and igniter assembly can be stowed securely inside the fuel tank when the torch is not in use providing secure and compact storage.

A fuel trap in the spout and check-valve assembly in the tank cover provide flash-back protection whilst the breather valve assembly ensures a smooth flow of fuel when the tank is in use.

Flat bottom for stability.

The unit carries a no. of U.S. approvals including:

Forest Service Specification 5100-614  
NFES 0241

U.S. DOT requirements for the transport of flammable liquids.

NSN 4210-01-558-9951

**CARRY AND STORE YOUR DRIP TORCH WITH THE SAME CARE YOU WOULD GIVE TO ANY FUEL TANK.**

## W8565 Wildfire Equipment Drip Torch

Designed and manufactured to meet rigorous US DOT and Forestry Service specifications

Intelligent design allows for internal stowage of the spout and igniter assembly providing compact storage and transport.
