

Hose Ancillaries

W759125 Battery Hose Washer

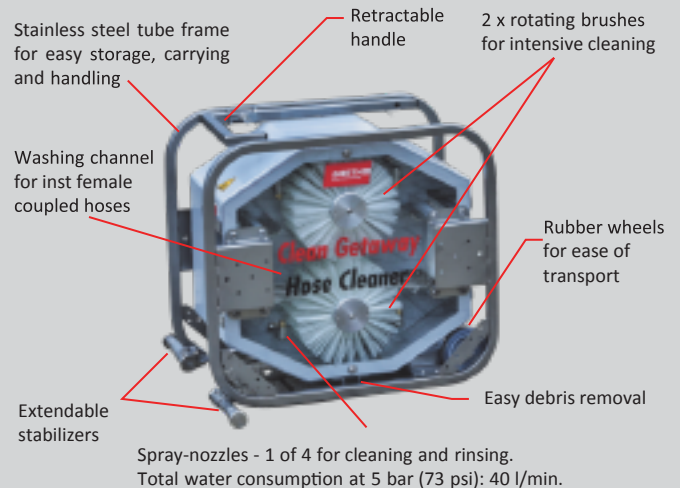

W759125 BARTH Clean Getaway Portable On-Scene Hose Cleaner.

The Clean Getaway, designed and engineered to simply, efficiently and effectively clean hoses BEFORE they are restowed on the engine/vehicle and ready for the next incident. The Clean Getaway eliminates needless exposure of firefighters to carcinogens and the unnecessary extra work historically associated with hose cleaning. It works equally effectively on Type 1, 2 and 3 hoses.

In recent years, FRS cancer mitigation efforts have evolved from a near singular focus on the need for advanced cleaning of PPE. In most brigades the current approach has been expanded to include emphasis on the need to perform on-scene gross decontamination, PER (Preliminary Exposure Reduction) of personnel, PPE, equipment, and now fire-fighting hoses prior to departing the fireground.

The deep clean process is accomplished by two specially designed brushes with long cleaning bristles. After the hose is loaded into the washing canal, the long bristles catch the coupling and the hose is then pulled through the machine by the brushes automatically. Only one person is needed to comfortably and effectively operate the machine.

Battery Runtime	> 60 mins
Electrical power supply	28V / MILWAUKEE battery 4
Water pressure	- 7.5 bar (60 - 110 psi)
Water supply	Storz 25 or 1.5-9 NST female
Dimensions (HxLxW)	580 x 550 x 330 mm
Weight	30 kg (66 lb)
