Certified - Model: VF HELMET

Ergonomics and versatility  
with a high level of protection.

# vft1 Helmet

Ergonomics and versatility with a high level of protection.

The **vft1 Helmet** was designed to meet the needs of units that intervene in wildland fires and rescue operations. Made of high-quality materials, it offers a high level of protection with the front visor and protective side which is specially designed to protect the ear area. The vft1 is a comfortable and versatile helmet that can be connected to a number of accessories.

## Greater protection and resistance

A wrap design for better protection from side, front and rear impacts manufactured with one sole PC/ABS part, without any added paint.

## More comfortable and breathable

Completely size adjustable with an adjustment wheel<sup>1</sup>. The breathable and fireproof cushioned fabric pads form a totally ergonomic and comfortable harness.

## Customization

A large variety of colors available, reflective strips with marking and the possibility of adding a shield.

### Standards

<b>EN 16471:2014</b>	Helmets for wildland fire fighting.
